Quality Construction
for 15 years.

Our Story

After working for nine years learning the trade, I began my own company with one driving idea. If I work hard and am honest then my business will succeed. And now after fifteen years I have a thriving construction business with many happy clients. With every happy client I get referrals, and referrals are the source for all my new projects.

The largest project to date was a 1.2 million dollar remodel addition. The Average size project is between \$150,000 and \$600,000. But no job is too small.

Project types

Bathroom and kitchen remodeling
Additions and complete house remodeling.

New Construction.

Custom wood working, cabinets, furniture, stair railings, moldings.

Custom front door personally designed with client's input, then fabricated in my shop.
